18	12 feet from stile	N side of the lane, 12 feet L of stile in the wall	
19	open shelter	open (no roof) shooting hut, inside, and below N facing window	
20	south side exterior wall (weather worn)	over the ground floor window carved in a large supporting stone, very weather worn (will take you back to 1)	
Notes			
These are numbers carved in stone and scattered in the Goyt and Combs area.			
The numbers can be found on bridges, gate posts and in walls.			
They are about 2" high and represent either a 6 figure grid reference or a compass bearing and distance in yards xxx yyy(y).			
Each clue denotes the location of the next marker. There are 20 in total over a distance of approximately 18 miles			
Clue 1 is located to the rear of the White Hall Centre, access from Old Road only (not Long Hill)			
Highly recommended to run/walk as a pair / group, for both safety and to search for the numbers			
Pen/pencil and paper needed unless you have a very good memory			
Route covers some high and remote ground, and can be very challenging in poor weather			
Do not underestimate the time needed to find some of the numbers. Check carefully that you're in the correct location.			
Control 12 - grid reference is somewhat inaccurate, start looking for the feature well (200 yd) to the north of the GR
