

# Joe Brown's Numbers crib sheet

Pink clues are the northern 11 mile route, starting from clue 14.

Blue clues are the southern 8.5 mile route starting from clue 5.

The last column shows the actual clues Joe carved which point to the next clue.

6-figure clues are map grid references. Those with two sets of numbers separated by an x are compass bearings followed by distances in yards.

Both routes start from The Street car park between the twin reservoirs and are featured on the goyt-valley.org.uk website.

GPX files are also available on the website.

The author used the What3Words app to complete the routes, navigating between the clues using the Mappy app. But you may prefer to go the way Joe intended – with a paper map and compass.
